### Womens Jersey Size Chart

Ladies Jersey Chest Measurement (inches)	XS	S	M	L	XL	2XL	3XL	4XL
	28-30	30-32	32-34	34-36	36-38	38-40	40-42	42-44

Our size guide is based on the average body shape. To get the best fit simply measure around your chest and compare with the chart. Please find attached size guide instructions.

For example if your chest measures 40 inches you would require a size MEDIUM jersey There are two inches of extra fabric to allow for movement in the body. The jersey will measure 42” around the chest measured from pit to pit.

If you prefer a tighter more professional fit you might want to consider ordering a size smaller. If you’re actual chest is 40 inches you can choose a SMALL size jersey (38”) the jersey will be 40 inches pit to pit and will fit tighter.

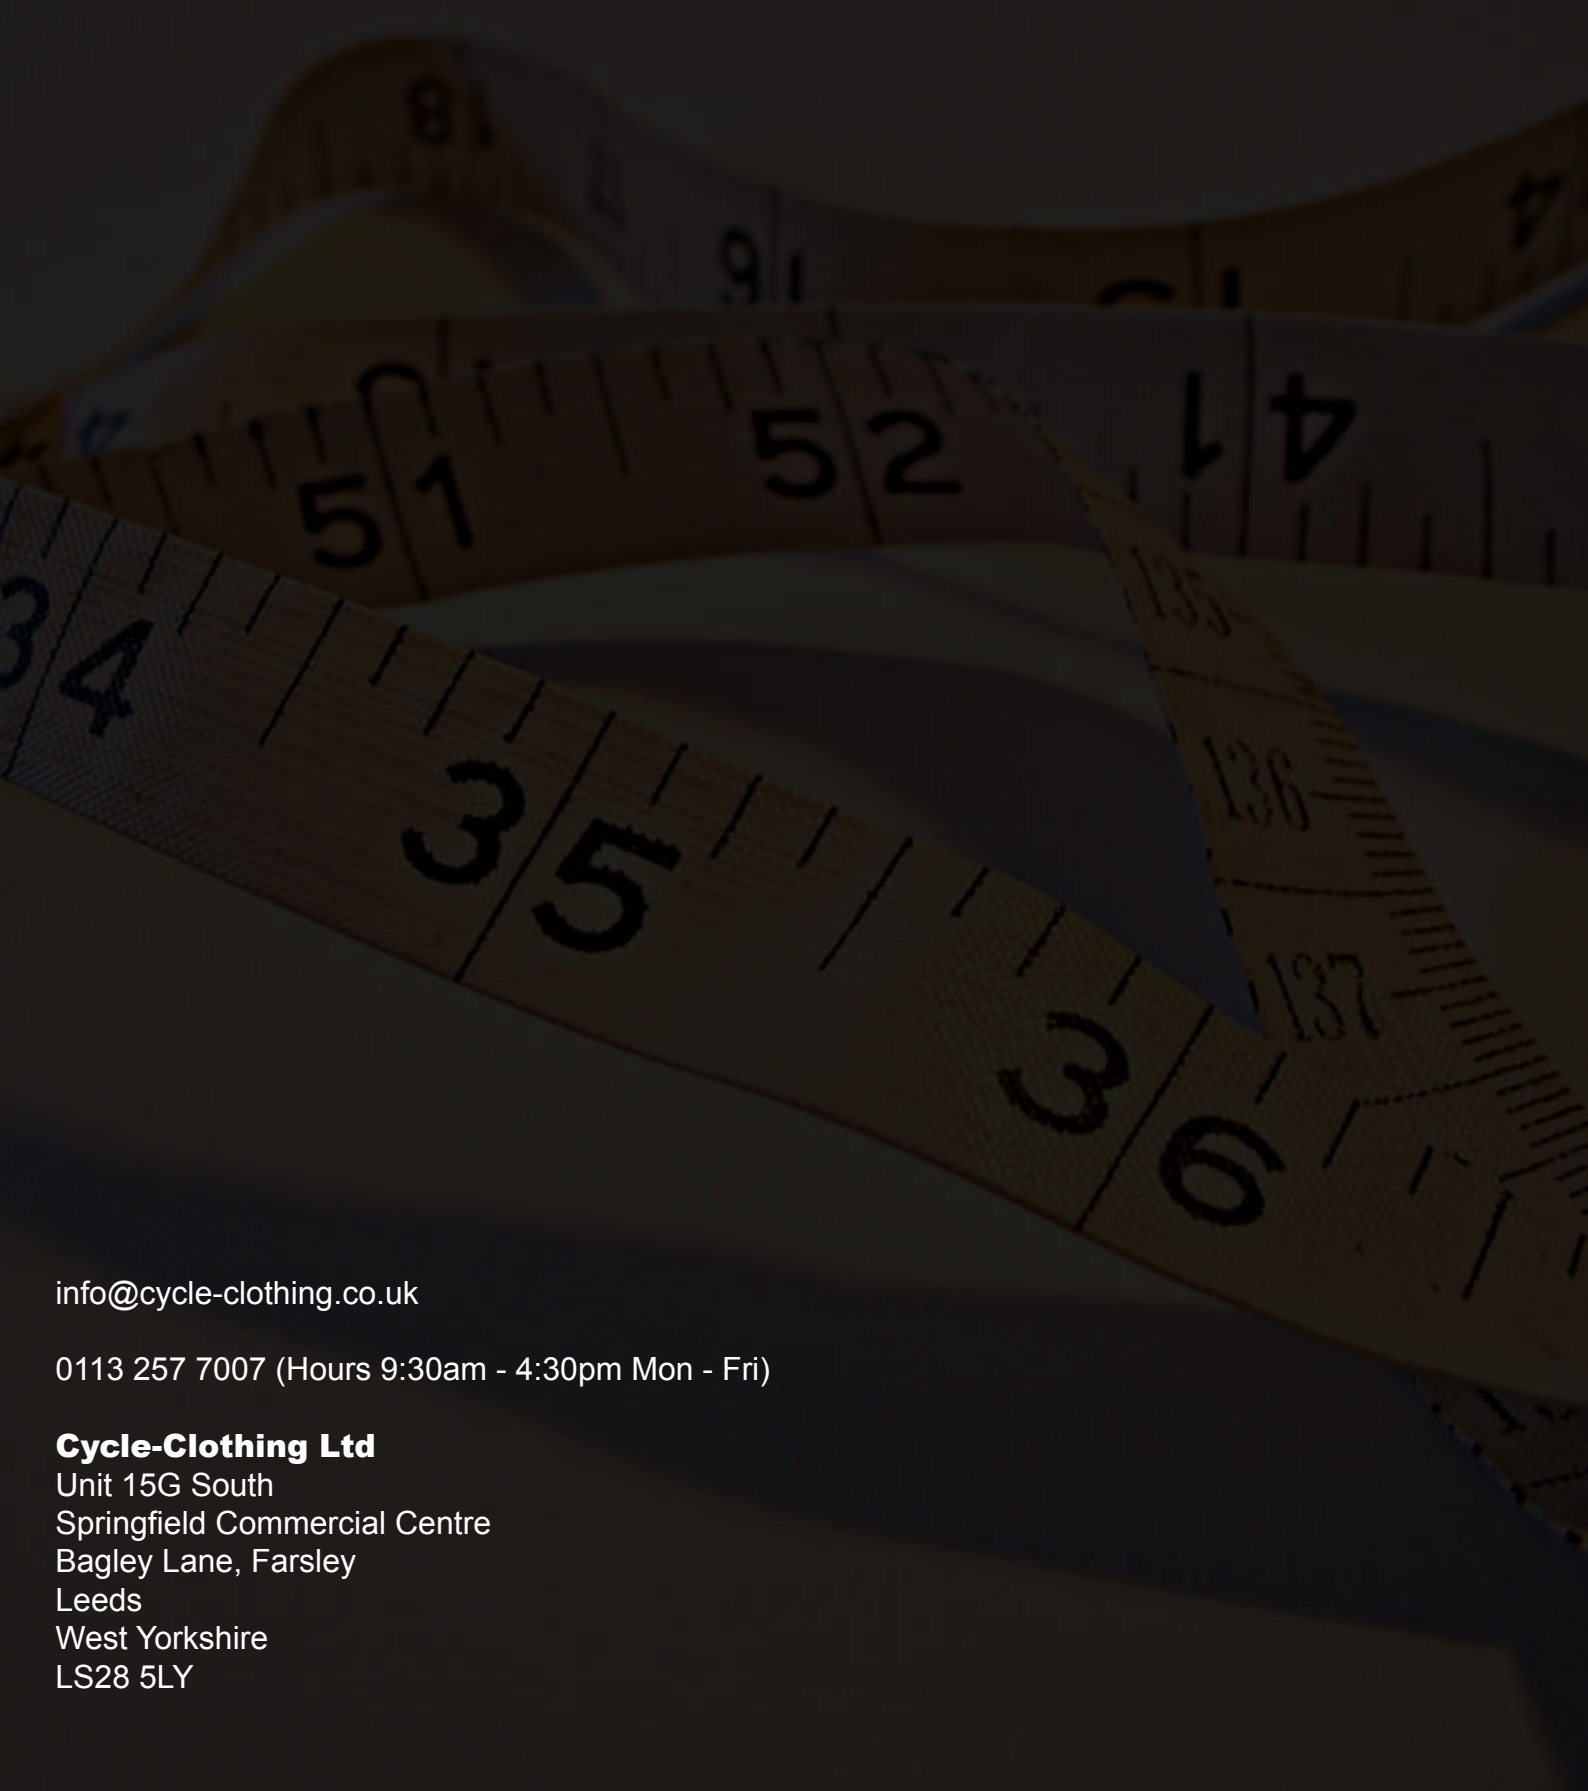

If you have any concerns regarding sizing one of our friendly members of staff will be able to help. Size samples are available on request. A refundable deposit is required for size samples.

All cycle-clothing products are based on actual body measurements.

To get accurate body measurements, use a tape measure and measure as shown.

compare your measurement against our size chart to choose the best fit.
